## Cal-Mate CP Feature | Benefits

Easy to administer | give two bolus at calving or one bolus prior to or immediately following calving and an additional bolus 12-24 hours later

Provides calcium propionate which is a very highly available source of calcium as well as glucose precursor to help with prevention of ketosis

Includes calcium chloride which provides a rapid release of calcium that is quickly absorbed into the bloodstream.

Quick dissolving | No withdrawal period

Soy-based coating for protection of the esophagus

Most economical bolus in the market

**MADE IN THE USA | GMO FREE**
