

Drench-Mate®

AF 24 EDT

AF 24 Electrolyte Drench Therapy is a blend of electrolytes, calcium, glucose precursors, niacin, **OSMOLYTE**, and live *Saccharomyces cerevisiae* yeast (used as a probiotic along with yeast culture fermentation products to provide postbiotic additives) to help rehydrate and support immunity, health, and performance of moderately and severely dehydrated cows.

ACTIVE INGREDIENTS:

	(per pound)	(per 1.0 lb. dose)
Calcium, maximum	3.70%	17 grams
Calcium, minimum	2.70%	12 grams
Salt, maximum	32.30%	147 grams
Salt, minimum	27.30%	124 grams
Sodium, maximum	19.70%	89 grams
Sodium, minimum	16.40%	74 grams
Potassium, minimum	5.00%	23 grams

INGREDIENTS:

Salt, Sodium Bicarbonate, Calcium Propionate, Potassium Chloride, Magnesium Sulfate, **BETAINE** Hydrochloride, Yeast Culture, Calcium Chloride, *Saccharomyces cerevisiae* yeast, Niacin, Mineral Oil.

RECOMMENDED USES:

To provide moderate and severely dehydrated cows with a blend of electrolytes, calcium, glucose precursors, niacin, **OSMOLYTE**, and live *Saccharomyces cerevisiae* yeast (used as a probiotic along with yeast culture fermentation products to provide postbiotic additives) to help rehydrate and support immunity, health and performance in these cows.

APPLICATION / FEEDING DIRECTIONS:

Mix 1 pound *Drench-Mate*® AF 24 EDT powder into at least 6.5 - 10 gallons of warm water and administer via a *Drench-Mate*® Drenching System to dehydrated animals. Administer via esophageal tube using the *Drench-Mate*® drenching equipment once daily for next two days if needed.

Betaine is an osmolyte that aids in water uptake by cells and is helpful in the reduction of dehydration. Betaine has been shown to protect cells from dehydration, normalizing cellular metabolism, growth and vitality of cells, when the animal is under stress, which can benefit animal health and welfare.

Do not feed dry powder to cattle. Avoid contact with eyes and skin. For animal use only. Drench should be stored in a cool, dry place. Open containers should be resealed to ensure maximum freshness. Under these conditions this should provide 12 months of shelf life from the manufacturing date shown below.

Net Weight 50 lbs. (22.68 kg)
